## What are You Most Excited about for EVs in Michigan?

### Ford EVs Are Made For More

I'm most excited about Ford electrifying our most iconic products: Mustang, F-150 and Transit, to start.

No compromises.

All-electrics are made for more.

It is no longer about compliance, it is about the next level of tech, performance and thinking toward the future.

The Mustang Mach-E is particularly fun for me. It lives up to the Mustang promise of fast, fun and freedom.

Ford and the state of Michigan have big opportunity to lead and we are, together.

The state of Michigan has a very important role to play going forward, working together with OEM's, consumers, utilities, private businesses, public businesses and government leaders to define the future.
