

In January 2021 the EC launched a first of its kind transportation electrification business council. The Electrification Coalition Business Council (ECBC) serves as a strategic advisory group supporting the EC's overall mission.

The ECBC includes members from across the entire supply chain and spanning all sectors of vehicles. ECBC Partners have the opportunity to directly engage in the strategic initiatives the EC undertakes to accelerate transportation electrification. There will be increasing opportunities for involvement as the EC continues to expand its implementation work and policy advocacy at the federal, state, and local levels.

## Exclusive Benefits for Members

### Networking

- ECBC Annual Roundtable for peer stakeholders.
- EV Bootcamps that provide customized technical and policy training to states within the EC's State EV Policy Accelerator.
- Select panels and workshops curated by the EC at related external national conferences.
- ECBC gatherings at related external national conferences.
- Events and webinars with EC city and state partners.

### Communications and Thought Leadership

- Annual feature in EC Newsletter.
- Monthly press releases announcing new ECBC Partners.
- Branding on EC website and EC boilerplate slide decks.
- Option to collaborate on Op-Eds and co-brand reports.

### Intelligence, Access, and Engagement

- First-look input and engagement on policy, program, and project announcements.
- Receive advanced copies and provide perspective on key white papers, roadmaps, and reports.
- Exclusive bi-monthly strategy calls with the EC's National Director.
- State EV Policy Accelerator calls.
- Calls and updates as necessitated by new policy or project developments.
