## May MyCharge Score

### Congratulations!

You charged 91% of the time during off-peak hours, helping your community keep a resilient grid. Keep up the good work!

## Gas Comparison

You paid: **\$14**  
To charge this month

You would have paid: **\$40**  
To fuel a similar gas-powered car\*

You paid the equivalent to: **\$0.71**  
Per gallon\*

Your avoided emissions this month are equivalent to planting **9 trees\***

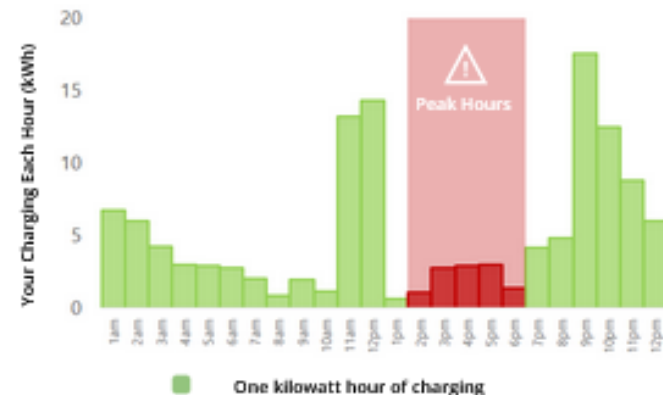

## May Quick Tips

Did you know that demand is highest between 2-7pm – charging at off-peak times can avoid building new power plants?

[Click here to learn more and what you can do to avoid emissions during peak times](#)

## My Charging Times (Sum for All of May)

Your total cost for May charging:

**\$13.78**

You saved **\$11** from charging off-peak!  
You could save an additional **\$2** by eliminating on peak charging completely.
